

"We removed the Coke machine from our union hall and we are sponsoring this event to help bring justice to workers in Colombia, Guatemala and here at home."

Mike Monahan

Business Manager, IBEW Local 103

When we talk about corporate greed and injustice, Coca-Cola has a lot of company.

Local 103 members see multibillion dollar biotech/pharmaceutical companies paying executives exorbitant compensation packages while involved in price gouging, opposing lower cost generic drugs, defrauding taxpayers and governments out of billions of dollars by overcharging Medicare and Medicaid and fraudulently and dangerously marketing drugs for uses without FDA approval.

At the same time, companies that are cheating patients and the public are hiring general contractors who hire subcontractors who refuse to employ electricians protected by a union contract. Local 103 is fighting these companies.

Killer Coke **Casualties**
